TIME TO GET SERIOUS
about NYDFS Data-Centric Requirements

CISO/CCO's face new NYDFS 23 NYCRR 500 deadlines in 2018 and must align their Data Governance Programs to address data-centric security and compliance requirements. We can get you started on the road to compliance—quickly and easily.

Four NYDFS Data-Centric Requirements

01

500.15 Encryption of Nonpublic Information
Implement controls, including encryption, to protect Nonpublic Information held or transmitted both in transit over external networks and at rest

02

500.07 Access Privileges
Limit user access privileges to Information Systems that provide access to Nonpublic Information

03

500.06 Audit Trail
Include audit trails designed to detect and respond to Cybersecurity Events that have a reasonable likelihood of materially harming normal operations
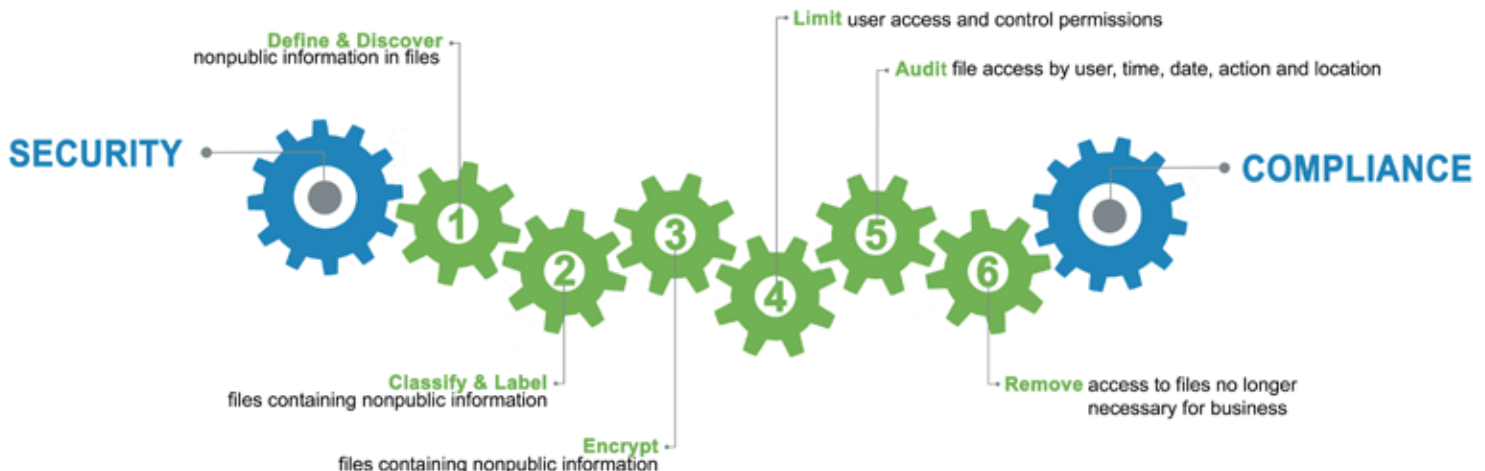

04

500.13 Limitations on Data Retention
Secure disposal on a periodic basis of any Nonpublic Information that is no longer necessary for business operations or for other legitimate business purposes

Quick Start to Data Security & Compliance

Fasoo's data-centric solutions comprehensively meet the four requirements of the NYDFS Part 500 Cyber Regulations. Fasoo's approach offers you a quick way to jump-start your efforts to comprehensive compliance.

Fasoo's Six Step Pathway to Data Security Compliance.

Define & Discover nonpublic information in files

Limit user access and control permissions

Audit file access by user, time, date, action and location

SECURITY

COMPLIANCE

1 2 3 4 5 6

Classify & Label files containing nonpublic information

Encrypt files containing nonpublic information

Remove access to files no longer necessary for business
